

EASY TO USE:

To operate the Biometric Reader, authorized property personnel simply place their finger on the reader which activates the datalog. The process is that quick and that easy!

HandyTrac continues to demonstrate our commitment to servicing the industry by offering new, innovative products that minimize liability and maximize security.

INTEGRATED BIOMETRICS READERS

for HandyTrac Access and Key Control Systems

HandyTrac is proud to announce the development of the only “integrated” biometric reader in the key control industry. Incorporated directly into our Generation 10 Ethernet Datalog, this innovative, leading-edge product is being offered to both new and existing customers.

FEATURES:

- The only “integrated” biometric reader in the key control industry
- Maintains ability to use bar code employee badges if desired
- Fast-typical read time is half as long as punching in a 4 digit code
- Integrated device does not require additional desktop or wall space
- Alternative to employee ID badges

BENEFITS:

- No exposed cables or connections
- Better protected against accidental damage
- Makes it even faster to gain access to keys
- Eliminates frustration due to lost or damaged employee badges
- Enhances audit trail credibility via the most widely accepted personal identification method - the human finger print
- Prevents the passing of employee badges and PIN to unauthorized persons
