

HandyTrac Online[®] for Schlage Programmable Electronic Lock Systems.

As Ingersoll Rand/Schlage's technology and service partner, HandyTrac leverages extensive multifamily industry experience to provide Internet based support and productivity tools not available from other service providers.

Internet based

Perform administrative functions remotely from any PC that has Internet access.

Custom reporting by site, region or national level

Generate customized reports by site, region or national level.

Vendor performance verified by site or region

Know how vendors and employees were in what units and why.

Staff productivity evaluation/enhancement tools

Create graphs of staff productivity in preventative maintenance and other regular site functions.

Automated audit trail and secure off-site data storage

All data is stored in a remote facility with military grade security and triple redundancy protections.

Disaster recovery program

The HandyTrac Technical Team can have your system operational in just minutes.

Training and Support

Our Technical Team is always available for software & hardware support and training.
